

CISD Science Safety Contract

All science classes in Conroe ISD are hands-on laboratory classes. To ensure a safe environment, a list of safety rules has been developed for each science class and provided to your student.

Students will be removed from the science laboratory activity by the teacher if:

- A. Their dress is such that they can cause injury to themselves or to other students.
- B. They are behaving in such a manner that they can cause injury to themselves or to other students.
- C. They are not following the prescribed safety rules for the science laboratory activity area or the particular science activity being conducted.
- D. They are going beyond the limits of the science laboratory activity into areas that may lead to an unsafe situation.

Contact lenses are controversial in the science laboratory. Some experts feel they are an added risk if there is a chemical splash in the eye. Soft contact lenses may increase the risk because they absorb chemicals which enter the air as fumes. In such cases, damage may occur to the lens, if not the eye. All students must wear safety goggles to prevent any such accident. Parents are responsible for making the decision about whether their students will wear contacts during the lab or will remove them prior to the lab.

I have discussed all the safety rules with my student. They are aware that their safety and the safety of their classmates depend on their behavior in the lab. With this in mind, they agree to closely follow the oral and written instructions provided by their teacher.

I have discussed all the rules with my child and I feel that my child understands what the rules mean.
